Thanks Joe, I'll let everyone know when they pick them up but I think you'll know since we'll need to get the keys from you. I assume they are in the cabinet?

These vehicles have all been Deprepped. Paperwork turned in and are parked in the "North Lot". We will need to know when they have been picked up so that the "Exit Paperwork" can be completed.

Thanks

No date yet. Probably set a date after we know the vehicles are ready. I estimated that they would be ready later next week but there's no urgency on this.

Lynn,  
We will gather the vehicles and remove the EPA items from them.  
We will get the spare keys (some have them) rounded up.

I will assume that the EPA license plates also need to be removed.  
Some of these came in with M plates on them....we will put them back on as well.

Hi.

Please prepare the vehicles below for pick-up by VW in the way described by Jim. If you have any questions about deprepping the vehicles, please contact Jim.

Thanks,

Lynn

Hi Lynn,

We are done testing the GEN 1 Audi diesels. Please have Jacobs de-prep and check them for release. They do not need to be returned exactly to stock. Remove any of our hardware that we want to keep. 0003 and 0004 may have already been de-prepped after PEMS testing but 0001 and 0002 are still set up from lab testing. I think the trailer hitches are VW's.

Y400-0001	2012 Black Audi Q7 061M449		Gen 1.2

Also, I told VW to pick up the GEN 2 Audis that were de-prepped last year. I'll let you know when they should get the keys ready.

Hi Greg,

I think you are the right person for this? The Gen 2 Audi diesels are for return. They were de-prepped a while ago. Just let us know when you are coming to get them so we have the keys ready.

GEN 2 Audis ready for pickup.

I am also finished with the Gen1s too but some need de-prepping. I am sure they will be ready to pick up next later week.
